You will be working with our UI implementation team in laying the foundation and architecture of the user interface for our online systems. Your systems are cleanly designed, favor simplicity, and are flexible enough to allow for future expansion.

You will be working as part of our feature teams, including but not limited to quality of life improvements, monetization and retention features of Rainbow Six Siege.

- Work closely together with architects and technical leads within Rainbow Six around the world.
  - Collaborate with artists and designers in delivering world-class user interface systems.
  - Siege is a fantastic game with a great community, and we work to improve the experience for our users. You are able to carefully balance the need of a developer with the expectations of the end-user.
  - Work on a feature from conception, to research, to final implementation.
  - Design and implement UI screens and components in C++
  - Improving and extending existing game UI and UI framework
  - Setting up wireframes for UI Artists and Designers to work in
  - Design and implement client-side UI logic, working together with Online Programmers.
- 
- 5+ years of professional experience.
  - Strong C++ skills
  - Good understanding of the MVVM paradigm
  - Good understanding of modern Software Engineering
  - Master or Bachelor degree in (Applied) Computer Science or any relevant qualifications with a strong technical background
  - Excellent communication skills, and desire to work as a team-player
  - Self-direction and motivation
  - Fluent in English
