Build & Release

Joining Build & Release, a division of Ubisoft, you will be supporting game productions and tech teams in all their needs with build system, version control and automation for their projects. This means working inside the pipelines, behind the scene of the systems. Our goal is to enable the projects to do their work as efficient as possible. We currently have 3 cooperation's with large game projects across Ubisoft.

Your Impact

You will be building and establishing an automation test strategy for one of our unannounced game titles in collaboration with the team's testing and Build & Release departments. This includes managing the close collaboration with the quality assurance team and developers for a successful implementation.

As an Automation Engineer, you contribute to create, build and improve an automated testing setup to guarantee a certain level of quality and decrease the manual testing efforts throughout the game's development and deployment. You will also be responsible for reviewing existing solutions and providing feedback to the different stakeholders.

- Create an automation test framework for internal games, applications, and services within the game and Ubisoft's environments
 - Develop functional tests for multicomponent games and applications
 - Implement test solutions to the test workflow
 - Closely collaborate and exchange with testing, development and external teams
 - Engage and support when encountering issues in the process
 - Actively participate in the centralized discussions and efforts towards global automation strategy of Ubisoft
-
- 2+ years of experience in Quality Assurance in the area of automation
 - Broad knowledge on different programming and scripting languages like C#, C++
 - Good knowledge of different test frameworks

- Experience with different versioning systems, preferably Perforce
- Experience in the development of functional testing and test frameworks
- Experience with continuous integration tools and build pipelines like Jenkins, team city, Bamboo
- Good oral and written communication in English

Bonus:

- Knowledge of streaming technologies
- Knowledge of Cloud solutions
- Knowledge of Packaging Systems (zip, nu-get, chocolatey)
- Experience of working with unit tests
- Experience in REST API testing
- Experience working in Linux
- Experience with signing and fingerprinting
- Knowledge of Python
