Your Impact:

- Be a point of contact for the technical performance of the game and features
  - Design, implement, maintain and optimize game and engine systems in Unity C#
  - Code review the work of your peers and provide valuable feedback
  - Identify risks and opportunities presented during the development and provide solutions to resolve potentially complex problems
  - Help the Lead Programmer in hiring and interview processes as needed
  - Share your knowledge with others on the team regularly
  - Keep your skills current and be continually learning
- 
- 5+ years of development experience and shipped at least two AAA titles (or equivalent)
  - Master, Bachelor or equivalent in computer science or engineering (Masters counts for 1-2 years experience)
  - Strong programming skills in Unity and C#
  - Excellent grasp of memory and performance bottlenecks within Unity, VR, and Android devices and experience with the tools and techniques to find them
  - Proficient in refactoring and optimizing complex, sometimes entangled, systems
  - Knowledge of how to use the Burst compiler and Jobs to optimize is a big plus
  - Strong code reviewing and debugging and problem solving skills
  - Understanding of multi-threaded principles
  - Ability to work efficiently with a large existing code base
  - Knowledge of different software development methods (e.g., Agile, SOLID, Unit Testing)
  - Knowledge of software development environments and associated tools. (e.g., Visual Studio or Rider, Perforce, JIRA, etc.)
  - Excellent time management, reporting and documentation skills
  - Fluent in English, both verbally and written and a positive team-player attitude
- 
- Experience with C++ programming is a plus
