Tom Clancy's Rainbow Six: Siege is an intense, new approach to the first-person tactical online shooter experience. You can now join our team to help us shape this amazing project.

As an Online Programmer on our team, you will work alongside world-class developers of different specializations, ranging from Engine, Network and Front-End Programming. Everyone on the team is eager to share their knowledge and for you to contribute your own expertise.

You will be given the opportunity to work on mandates that impact the overall performance of the title, as well as the productivity of the worldwide development team itself. Tom Clancy's Rainbow Six: Siege is an ever-evolving title, as such, you will be tasked with finding solutions for complex technical challenges in our title, which boasts over 80 million registered players across 5 different platforms.

## What you will do:

- Investigate efficient implementation options for new features in coordination and collaboration with several other teams in different studios on three continents.
- Develop performant and reliable components for monetization features, improving the overall shopping experience for the game.
- Design, build, and implement microservices for exciting new Rainbow Six Siege features.
- Integrate existing and new online services
- Propose sensible code refactoring and reduce technical debt.
- Contribute to maintaining our code at a high level of quality.
- Analyze existing code and infrastructure to optimize performance, minimize errors and enhance the overall player experience

## What you bring:

- Degree in Computer Science, or similar qualification with a strong technical background.
- Strong skills in C++.
- 3+ years of professional experience in developing and optimizing online systems.

- Knowledge or willingness to learn Golang.
- Analytical and creative problem-solving skills and an aptitude for learning new technologies.
- Focus on efficiency, code quality and user experience.
- Ability to compile and analyze data, processes, and codes to troubleshoot problems and identify areas for improvement.
- Excellent verbal and written communication skills in English (our studio language is English).
- Passion for video games and technology.
- You are open to relocate to the general area of Duesseldorf, Berlin or Mainz in Germany

\*Experience in working with SQL / Relational Databases is a plus.

\*Experience in on-demand cloud computing platforms (AWS/Azure/etc.) is a plus.

\*Deep understanding of game development process and practice is a plus.
